SUMMARY

Passionate about programming young specialist with great soft skills and ability to learn quickly. Willing to launch my engineering career in a place full of high-quality experts, to be able to constantly improve my professional competencies and be a perfect addition to the team.
Currently getting my bachelor's degree as a Computer Engineer

EXPERIENCE

07/2023-08/2023

Personal Developer Blog Project
My personal blog site for publishing posts. Users are able to authenticate with Google to leave comments, save posts for a read-later list via sessions and view relevant information about the developer.

02/2023-03/2023

Electricity Shutdown Scheduler Project
Django project for convenient alerts of electricity shutdown. Users can register with Google or Email, subscribe for specific electricity schedules and receive information about the shutdown on their email or view it directly on the site. The Project was developed during Python internature in Eleks company by a team of 6 people with mentor's supervision.
Technologies:
- Python/Django, Flask(for API)
- HTML, CSS, JavaScript
- PostgreSQL, MongoDB(for API)
- captcha, django-allauth, six

02/2022-04/2022

News Educational Project
A project application that allows you to publish recent news, which also includes the possibility to attach comments for the selected news by the visitors.

10/2021-12/2021

Quiz Educational Project
The interactive quiz project where the admin could add custom quizzes, registered users could pass them, and in the end, see the result.

07/2021 - 09/2021

Blog Educational Project
A simple blog application based on the Django framework where the administrator can register and simply manage posts by adding, editing, and removing. Visitors can add posts to "read later list" and leave comments.

EDUCATION

2020 - ongoing

Bachelor's Degree in Computer Engineering
Vasyl Stefanyk Precarpathian National University
Department of Computer Engineering and Electronics
